PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 1+ year experience building scalable web applications using JavaScript, React, Node.js, and MongoDB. Specialist in React.js(Vite), Tailwind CSS, and Bootstrap. Delivered production systems serving 1000+ users with 99.9% uptime. Achieved 20% performance improvement and 15% technical debt reduction through algorithmic optimization. Expertise in RESTful API design, microservices architecture, database optimization, and agile development. Strong foundation in data structures, algorithms, and system design.

TECHNICAL SKILLS

Programming Languages: JavaScript ES6+, HTML5, CSS3, SQL

Frontend Technologies: React.js, Redux, Redux Toolkit, Context API, React Hooks, Tailwind CSS, Bootstrap, jQuery, Responsive Web Design, Single Page Applications

Backend Technologies: Node.js, Express.js, RESTful API, Microservices Architecture, JWT Authentication, API Gateway

Database Systems: MongoDB, MySQL, NoSQL

Development Tools: Git, GitHub, Postman, VS Code, npm, Vite

PROFESSIONAL EXPERIENCE

MERNStackDeveloper|Alinfox

January 2025

- Engineered production-grade full stack web applications serving 1000+ concurrent users with 99.9% uptime using React, Node.js, Express, MongoDB achieving high scalability and reliability
- Architected and deployed RESTful APIs processing 10000+ daily transactions with optimized MongoDB queries, reducing average response time by 35%
- Improved application performance by 20% through React optimization: memoization, code splitting, lazy loading, virtual DOM optimization, Redux state management refactoring, and efficient rendering strategies
- Led cross-functional team collaboration in Agile/Scrum environment with 8+ engineers, conducted daily standups, sprint planning, retrospectives, delivered 15+ features on schedule with zero critical bugs
- Implemented comprehensive monitoring, logging systems, error tracking with real-time alerts improving system observability and reducing mean time to resolution by 30%
- Developed reusable component library with 40+ React components following atomic design principles improving development velocity by 25%

TECHNICAL PROJECTS

B2B E-Commerce Platform | React, Node.js, Express, MongoDB, MySQL, Microservices, REST API

- Developed scalable B2B marketplace processing 1000+ daily transactions with real-time inventory management, automated order workflows, payment processing, notification system using event-driven microservices architecture
- Enhanced database query performance by 20% implementing microservices, optimizing SQL joins, MongoDB aggregation, query caching with Redis, connection pooling
- Built secure authentication system with JWT tokens.
- Implemented advanced search with filters, faceted search, pagination, sorting, autocomplete handling 500+ concurrent queries with Elasticsearch-like functionality
- Designed responsive UI with React, Tailwind CSS supporting 10+ device types, implemented infinite scrolling, skeleton loaders, optimistic UI updates

Video Streaming Platform (Netflix Clone) | React, Redux, TMDB API, Axios, Tailwind CSS, JavaScript

- Built responsive video streaming platform with real-time search, content recommendation engine, dynamic content filtering serving 500+ concurrent users with seamless user experience
- Reduced API requests by 40% implementing debouncing, throttling, request caching, Redux centralized state management, service workers optimizing bandwidth and server load
- Developed 25+ reusable React components, custom hooks, higher-order components, render props improving code reusability by 30% and accelerating feature development
- Implemented progressive image loading, lazy loading, error boundaries, code splitting, route-based chunking reducing initial bundle size by 45%

EDUCATION

Bachelor of Computer Applications (BCA)

DAV College, Chandigarh, India

MERN Stack Developer Professional Certification

Netmax Technologies Pvt. Ltd., Chandigarh, India

May 2024

2025
