PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 1+ year experience building scalable web applications using JavaScript, React, Node.js, and MongoDB. Specialist in React.js(Vite), Tailwind CSS, and Bootstrap. Delivered production systems serving 1000+ users with 99.9% uptime. Achieved 20% performance improvement and 15% technical debt reduction through algorithmic optimization. Expertise in RESTful API design, microservices architecture, database optimization, and agile development. Strong foundation in data structures, algorithms, and system design.

TECHNICAL SKILLS

Programming Languages: JavaScript ES6+, HTML5, CSS3, SQL

Frontend Technologies: React.js, Redux, Redux Toolkit, Context API, React Hooks, Tailwind CSS, Bootstrap, jQuery, Responsive Web Design, Single Page Applications

Backend Technologies: Node.js, Express.js, RESTful API, Microservices Architecture, JWT Authentication, API Gateway.

Database Systems: MongoDB, MySQL, NoSQL

Development Tools: Git, GitHub, Postman, VS Code, npm, Vite

PROFESSIONAL EXPERIENCE

MERN Stack Developer | Alinfox

January 2025- January 2026

- Built scalable full-stack web apps handling 1000+ concurrent users with 99.9% uptime using React, Node.js, Express, and MongoDB.
- Built and deployed REST APIs handling 1000+ daily requests, improving response time with optimized MongoDB queries.
- Improved app performance by 20% using React optimizations like memoization, lazy loading, code splitting, and better state management.
- Built 40+ reusable React components using atomic design, increasing development speed by 25% and improving code consistency.

TECHNICAL PROJECTS

B2B E-Commerce Platform | React, Node.js, Express, MongoDB, MySQL, Microservices, REST API

- Built a scalable B2B marketplace handling 1000+ daily transactions with real-time inventory, automated order workflows, and notifications using microservices.
- Improved database performance by 20% using optimized queries, MongoDB aggregation, Redis caching, and connection pooling.
- Built secure authentication system with JWT tokens.
- Built advanced search with filters, pagination, sorting, and autocomplete, handling 500+ concurrent queries.
- Designed responsive UI with React, Tailwind CSS supporting 10+ device types, implemented infinite scrolling, skeleton loaders.

Video Streaming Platform (Netflix Clone) | React, Redux, TMDB API, Axios, Tailwind CSS, JavaScript

- Built a responsive video streaming platform with real-time search, content recommendations, and dynamic filtering, supporting 500+ concurrent users.
- Reduced API calls by 40% using debouncing, throttling, caching, and optimized state management.
- Built 25+ reusable React components and custom hooks, improving code reusability and speeding up development.
- Implemented progressive image loading, lazy loading, error boundaries, code splitting, route-based chunking reducing initial bundle size by 45%.

EDUCATION

Bachelor of Computer Applications (BCA)

May 2024

DAV College, Chandigarh, India

MERN Stack Developer Professional Certification

January 2025

Netmax Technologies Pvt. Ltd., Chandigarh, India

ADDITIONAL INFORMATION

Languages: English (Conventional), Hindi (Native), Punjabi (Native)
